Hello Barbara, Thank you for your concerns. The final FS is going to be different from the draft and will only have 4 sections, which follows the EPA's RI/FS guidance. We (EPA) are already drafting the first two and are working on developing the structure for the third section. As we complete each section, I'm going to come talk with the CAG about the new section of the document. We have read the deFur comments and are considering them in our revising of the document. The CAG and other interested members of the community will have additional opportunities to provide comments on the revised RI and FS once they have been finalized. The first of these meetings will be at the September CAG. I could come earlier this summer and discuss the overall changes that are being made, but I can't get too specific on some issues since we haven't done the analysis on everything yet. Let me know.

**Subject:** Review of deFur comments

Hi Kristine,  
We have scheduled the review of Peter deFur's notes for part of 3 meetings this summer (if needed). So it would be the second half of the PHCAG general meetings in July, August and Sept. to review his general comments (24 pgs). I believe we left off at page 7 with Chip.

A question: Does that work with your schedule? Is the timing too late for consideration by the technical committee this summer? or for inclusion in the Feasibility Study?  
thanks, Barbara
